logistic regration: binary va multiclass, algoritmlar oilasi, modellarni chaqirish, algoritm bilan modelni farqi nima? qanaqa algoritmlar bilasiz?
algoritm - oqituvchining otish uslubi
evoluation -> modelning qanchalik togri va notogri ishlayotganini aniqlab beradi
baseline model bilan improvment model farqi?
Linear equation

markdown

x - input
y - output
Betta - parametr
epsilon - err

markdown

Linear Regration -> eng yaqin javoblarni topish, eng yaqin javoblardan otish

markdown

Simple LR va Multiple LR ga bolinadi

markdown

kuchli tomonlari: tez va sodda, kichikroq datalar bilan ishlashda oson, baseline model, kam chqiqim

markdown
